METALLURGIA—Index to Volume 46

JANUARY—DECEMBER 1979

A

Accident pattern, metals industries' 222
Advanced aluminium extrusion press comes on stream ... 473
Advances in the control of open flame furnaces 568
Advances in the development of low thermal mass 269
Advances in E.D.M. technology 315
Alcan Sheet, billet heating at ... 272
All-purpose vacuum heat treatment furnace 55
Alphabetical list of suppliers of health and safety products, an 227
Aluminium alloy pistons, a re-assessment of hardness-method for estimating the service temperature of ... 402
Aluminium billet heating, fuel savings in gas fired 716
Aluminium brass, hot extrusion of 644
Aluminium bronze, industrial forgings 656
Aluminium, developments in ... 635
Aluminium, extrusion by indirect process 362
Aluminium extrusion press comes on stream, advanced 473
Aluminium extrusions, production and application of ... 652
Aluminium high pressure gas cylinders, extrusion of ... 725
An improved 9-carat yellow gold casting alloy 595
Annealing, continuous 197
Automated forging lines, fully ... 437
Automatic forging machine at Firth Brown 543
Automatic system for annealing and normalising forgings, fully 174
Atkinson's furnace equipment — the Ferro approach — Doncasters' castings, furnace furniture 102

B

Balancing of parting lines and estimation of forging load, centre of pressure determination 505
Bandsawing — principles and practice 17
Bar croppers employing up-to-date shearing methods, high speed 34
Billet and bar shears and friction screw presses 39
Billet heating at Alcan Sheet ... 272
Billets for forging, preparation of slugs and 341
Billet heating by electricity ... 363
Boron modified nickel high temperature alloys, production experience with 628
Brass — Engineering Design Awards 358
Bright annealing — advances in furnace design 270
Bright annealing, protective gas plant for decarburisation free 271
BCFG symposium — slug and billet preparation 130
BSC forging looks to the future 527
Buyer's Guide, classified ... 232
Buyer's Guide to the forging industry, a 544

C

Carburising and rotary hearth installations, sealed quench, hardening/tempering ... 189
Cassel Heat Treatment, new laboratory for 201
Castings '79 reflects developments in technology 121
55/18 Cast heat resisting superalloy up-dated for high temperature service 102
Centre of pressure determination, balancing of parting lines and estimation of forging loads 505
Chemical process, corrosion resistant alloy for use in the 108
Classified Buyer's Guide, Health & Safety 232
Coatings, high temperature, for protecting hot components in gas turbine engines 676
Coining/calibrating presses ... 44
Commercial aspects of superplasticity 621
Continuous annealing 197
Continuous casting of small cross section billets — first steps towards a general model 444
Contract heat treatment ... 202
Control and instrumentation equipment at West German exhibition 601
Control and instrumentation, furnaces 581
Control of open flame furnaces, advances in 568
Current trends in heat treatment of special steels 198

D

Developments in aluminium ... 635
Developments in specialised refractory materials 661
Developments in the use of refractory materials 391
Die block production, heavy forging and 531
Dies, automatic design of hot extrusion 736
Drop forge approach to major shut-down repairs — programmed maintenance, a ... 457
Drop forging industry, health and safety in 528

E

E.D.M. technology, advances in 315
Efco's Golden Jubilee 786
Effluent treatment from the metallurgical industry ... 725
Elements of preventative maintenance for furnaces ... 460
Engineering Design Awards — brass 358
Environmental health and safety problems — GKN's approach 225
Equipment for the metallurgical industry, laboratory 464
Estimation of forging loads, centre determination, balancing of parting lines and ... 505
Extrusion of aluminium high pressure gas cylinders ... 735
Extrusion, hydrostatic — forming a successful alternative ... 649
Extrusion by indirect process, aluminium 362
Extrusion press comes on stream, advanced aluminium 473
Extrusions, production and applications of aluminium 652
Extrusion route to high speed steel 775

F

Fabrication industry, how metallurgists help reduce costs ... 309
Factors involved in cropping tool selection 230
Ferro approach — Doncasters' castings — furnace furniture Atkinson's furnace equipment, the 102
Firth Brown, automatic forgings at 543
Firth Brown and Glossop superalloys 124
Fluidised bed gas carburising, internally fired 695

Fluidised bed techniques ... 187
Forging equipment symposium, US 536
Forging industry, Buyer's Guide to 544
Forging line with hot shear, semi-automatic 8
Forging lines, fully automated ... 537
Forging loads, centre of pressure determination, balancing of parting lines and estimation of 505
Forging lubricants, synthetic ... 451
Forging machine at Firth Brown, automatic 543
Forging, micro-alloyed carbon steels for 281
Forging operation, small-scale, succeeds on Tyneside ... 534
Forgings, fully automatic system for annealing and normalising 174
Forging show's success ... 6
Forgings, water descaling for ... 539
Forging, steels for 281
Forging, preparation of slugs and billets for 341
Fracture mechanics, a break for the metallurgist 493
Friction screw presses, billet and bar shears and 39
Fuel efficiency — Radyne's induction heating approach ... 418
Fully automated forging lines ... 537
Fully automatic system for annealing and normalising forgings 174
Furnace furniture — Atkinson's furnace equipment — the Ferro approach — Doncasters' castings 102
Furnace furniture — competing and alternative forms ... 97
Furnaces, advances in the control of open flame 568
Furnaces, elements of preventative maintenance for ... 460
Furnaces, fuels and fuels and future considerations ... 90
Furnace rebuilds and major overhauls 410
Furnace for stress-relieving at TI Tubes Ltd., special design of Teisen 721

G

Gas carburising, internally fired fluidised bed for 695
Gas cylinders, extrusion of aluminium high pressure ... 695
Gas fired aluminium billet heating, fuel savings in 716
Gas plant for decarburisation-free bright annealing, ... 217
Gas turbine engines, high temperature coatings for protecting hot components in ... 676
Gibbons Brothers, a report from; repairs and maintenance service 463
Glossop Superalloys and Firth Brown 124
Gold casting alloy an improved 9-carat yellow 595

H

Hammer forging PM high speed steel 26
Hardening/tempering, carburising and rotary hearth installations, sealed quench 189
Hardfaced weld metal and its resistance to wear 112
Hardness-relaxation method for estimating the service temperatures of aluminium alloy pistons, a reassessment of the 402
Health and safety in the drop forging industry 528
Health and safety in metal processing 95
Health and safety in the metal processing industries ... 218
Health and safety problems, environmental, GKN's approach 225
Health and safety products, and alphabetical list of suppliers 227
Heat treatment, contracts ... 202
Heat treatment equipment, preventative maintenance of ... 413
Heat treatment equipment, recent trends in 192
Heat treatment, trends in the market for 213
Heat treatment furnaces, all-purpose vacuum 55
Heat treatment, induction — practising what you preach ... 182
Heat treatment industry emphasises vacuum 61
Heat treatment, nitrogen application in 163
Heat treatment, the options, specifying for 262
Heat treatment plant, investment in modern 719
Heat treatment, the present position and future outlook ... 147
Heavy forging and die block production 531
High pressure gas cylinders, extrusion of aluminium ... 735
High speed steel, hammer forging 126
High temperature coatings for protecting hot components gas turbine engines 676
High voltage discharge forming process 761
Horizontal continuous casting of wide aluminium strip ... 660
Hot dip galvanising still protecting steel 120
Hot extrusion dies, automatic design of 736
Hot extrusion of aluminium brass 644
Hot retort vacuum furnaces ... 58
How metallurgists help reduce costs in the fabrication industry 309
Hydrostatic extrusion — forming a successful alternative ... 649

I

Improving turbine blade performance by solidification control 437
Induction heating — a versatile approach 194
Induction heat treatment — practising what you preach ... 182
Industrial Furnace Engineers, Society of, Confidence for the future 551
Industrial forgings, aluminium bronze 656
Inspection analysis for quality assurance 686
Internally fired fluidised bed gas carburising 695
Iron powder metallurgy ... 778

L

Laboratory for Cassel Heat Treatment, new 201
Linings, low thermal mass ... 197
Local protection 195
Low thermal mass furnaces, advances in the development of 269
Low thermal mass lining ... 197
Lubrication for the metals industry 452
Lubricants, synthetic forging ... 451

M

Machine noise, research into ... 288
Materials processing and the Open University 63
Metal forming — theory and practice 515
Metal industries' accident pattern 222
Metal processing, health and safety in 95
Metal processing industries, health and safety in the ... 218
Metal processing industries, the role of health and safety committees in the 220
Metallurgical industry, effluent treatment from 725
Metallurgical industry, equipment for 464
Metallurgy in action 259
Metals industry, lubricants for 452
Micro-alloyed medium carbon steels for forging 275
Modern heat treatment plant, Investment in 719

N

Nickel alloys, stockholding ... 106
Nitrogen applications in heat treatment 163
New steel abrasives plant boosts production 550
New laboratory for Cassel Heat Treatment 201

O

Open flame furnaces, advances in the control of 568
Open University, materials proccessing and the 63

P

Plant lay-out for maximum efficiency 92
Plasmared — a new technology for the manufacture of sponge iron 783
Powder metallurgy, some recent developments in iron ... 778
Powdrex preform process ... 768
Preparation of slugs and billets for forging 341
Preventative maintenance for furnaces, elements of ... 460
Preventative maintenance of heat treatment equipment ... 413
Production and applications of aluminium bronze 652
Production of porous ferrous components 761
Production experience with the boron modified nickel high temperature casting alloys ... 628
Programmed maintenance, a drop forge approach to major shut-down repair 457
Protective gas plant for decarburisation-free bright annealing 271

Q

Quality assurance, inspection analysis for 686

R

Reassessment of the hardness-relaxation method for estimation of the service temperatures of aluminium-alloy pistons, a 402
Recent trends in heat treatment equipment 192
Refractory materials, developments in the use of 391
Repairs and maintenance service, a report from Gibbons Brothers 463
Representative suppliers of equipment 326
Research into machine noise ... 288
Robots, work handlers to ... 752
Role of safety committees in the metal processing industries, the 220

S

Salt bath developments ... 191
Salt bath heat treament ... 790
Sealed quench, hardening/tempering, carburising and rotary hearth development 189
Service temperature of aluminium-alloy pistons, a reassessment of the hardness-relaxation method of estimation of 402
Sheet steel pressing for the motor car body industry ... 385
Short-wave IR heating permits on site stress-relief 201
Sintered permanent magnets, production boost for 779
Six recent developments ... 180
Slug and billet preparation; BCFG symposium 130
Society of Industrial Furnace Engineers—confidence for the future 551
Solidification control, improving turbine blade performance by 437
Spark erosion for precise predictable machining 321
Special design of Teisen furnace for stress relieving long tubes at TI Tubes Ltd. 721
Specialised refractory material, developments in 661
Special steel reheating, furnace modification for 715
Special steels, current trends in the heat treatment of 198
Specifying for heat treatment — the options 262
Small-scale forging operation succeeds on Tyneside ... 534
Stanley Tools, thermal processing at 266
Steel abrasives plant boosts production, new 550
Steel, hammer forging pm high speed 126
Steel, hot dip galvanising still protecting 120
Steels for forging 281
Stockholding nickel alloys ... 106
Stress relief, short wave IR permits on site 201
Stress relieving long tubes at TI Tubes Ltd., special design of Teisen furnace for 721
Superplasticity, commercial aspects of 621
Suppliers of equipment, representative 326
Synthetic forging lubricants ... 451

T

Teisen furnace for stress relieving long tubes at TI Tubes Ltd., special design of ... 721
Temperature distribution in vacuum furnaces 46
Thermal processing at Stanley Tools 266
Thermprocess '79 ... 344, 472
TI Tubes Ltd., special design of Teisen furnaces for stress relieving long tubes at ... 721
Trends in the market for heat treatment equipment 213
Turbine blade performance, improving by solidification control 437

U

Universal upsetter, a 26
UK drop forging industry ... 540
US forging equipment symposium 536

V

Vacuum furnaces, hot retort ... 58
Vacuum furnaces, temperature distribution in 46
Vacuum heat treatment furnaces, all-purpose 55

W

Water descaling for forgings ... 539
West German Exhibition, control and instrumentation at ... 601
Work handlers to robots — the new technological revolution 752
